	Audio	500mVrms (-4dBs), High impedance, RCA × 2	
Output	Video	1Vp-p, 75Ω, RCA × 1	
	Audio	500mVrms (-4dBs), Low impedance, RCA × 1	
Remote Control Unit		RM-C360 (Battery size : AA / R6 / UM-3 × 2)	

*Design & specification are subject to change without notice.*

# SAFETY PRECAUTIONS

1. The design of this product contains special hardware, many circuits and components specially for safety purposes. For continued protection, no changes should be made to the original design unless authorized in writing by the manufacturer. Replacement parts must be identical to those used in the original circuits. Service should be performed by qualified personnel only.
2. Alterations of the design or circuitry of the products should not be made. Any design alterations or additions will void the manufacturer's warranty and will further relieve the manufacturer of responsibility for personal injury or property damage resulting therefrom.
3. Many electrical and mechanical parts in the products have special safety-related characteristics. These characteristics are often not evident from visual inspection nor can the protection afforded by them necessarily be obtained by using replacement components rated for higher voltage, wattage, etc. Replacement parts which have these special safety characteristics are identified in the parts list of Service manual. **Electrical components having such features are identified by shading on the schematics and by ( $\Delta$ ) on the parts list in Service manual.** The use of a substitute replacement which does not have the same safety characteristics as the recommended replacement part shown in the parts list of Service manual may cause shock, fire, or other hazards.
4. **Don't short between the LIVE side ground and ISOLATED (NEUTRAL) side ground or EARTH side ground when repairing.**  
Some model's power circuit is partly different in the GND. The difference of the GND is shown by the LIVE : ( $\perp$ ) side GND, the ISOLATED(NEUTRAL) : ( $\text{⏏}$ ) side GND and EARTH : ( $\oplus$ ) side GND. Don't short between the LIVE side GND and ISOLATED(NEUTRAL) side GND or EARTH side GND and never measure with a measuring apparatus (oscilloscope etc.) the LIVE side GND and ISOLATED(NEUTRAL) side GND or EARTH side GND at the same time.  
If above note will not be kept, a fuse or any parts will be broken.
5. If any repair has been made to the chassis, it is recommended that the B1 setting should be checked or adjusted (See ADJUSTMENT OF B1 POWER SUPPLY).
6. The high voltage applied to the picture tube must conform with that specified in Service manual. Excessive high voltage can cause an increase in X-Ray emission, arcing and possible component damage, therefore operation under excessive high voltage conditions should be kept to a minimum, or should be prevented. If severe arcing occurs, remove the AC power immediately and determine the cause by visual inspection (incorrect installation, cracked or melted high voltage harness, poor soldering, etc.). To maintain the proper minimum level of soft X-Ray emission, components in the high voltage circuitry including the picture tube must be the exact replacements or alternatives approved by the manufacturer of the complete product.
7. Do not check high voltage by drawing an arc. Use a high voltage meter or a high voltage probe with a VTVM. Discharge the picture tube before attempting meter connection, by connecting a clip lead to the ground frame and connecting the other end of the lead through a 10k $\Omega$  2W resistor to the anode button.
8. When service is required, observe the original lead dress. Extra precaution should be given to assure correct lead dress in the high voltage circuit area. Where a short circuit has occurred, those components that indicate evidence of overheating should be replaced. Always use the manufacturer's replacement components.

## 9. Isolation Check

### (Safety for Electrical Shock Hazard)

After re-assembling the product, always perform an isolation check on the exposed metal parts of the cabinet (antenna terminals, video/audio input and output terminals, Control knobs, metal cabinet, screwheads, earphone jack, control shafts, etc.) to be sure the product is safe to operate without danger of electrical shock.

### (1) Dielectric Strength Test

The isolation between the AC primary circuit and all metal parts exposed to the user, particularly any exposed metal part having a return path to the chassis should withstand a voltage of 3000V AC (r.m.s.) for a period of one second.

(... Withstand a voltage of 1100V AC (r.m.s.) to an appliance rated up to 120V, and 3000V AC (r.m.s.) to an appliance rated 200V or more, for a period of one second.)

This method of test requires a test equipment not generally found in the service trade.

### (2) Leakage Current Check

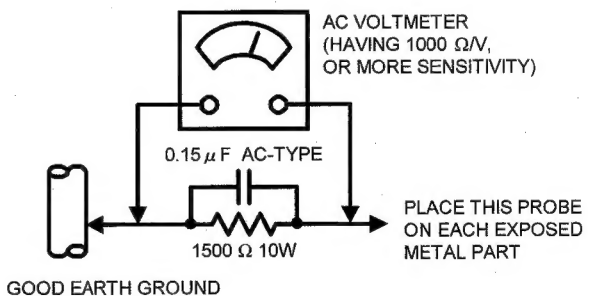

Plug the AC line cord directly into the AC outlet (do not use a line isolation transformer during this check.). Using a "Leakage Current Tester", measure the leakage current from each exposed metal part of the cabinet, particularly any exposed metal part having a return path to the chassis, to a known good earth ground (water pipe, etc.). Any leakage current must not exceed 0.5mA AC (r.m.s.).

However, in tropical area, this must not exceed 0.2mA AC (r.m.s.).

#### ● Alternate Check Method

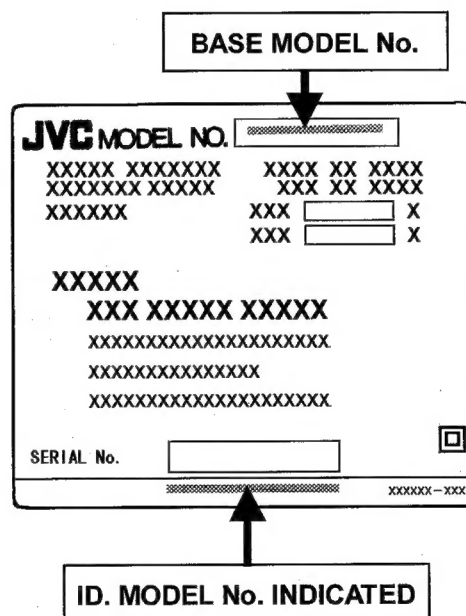

Plug the AC line cord directly into the AC outlet (do not use a line isolation transformer during this check.). Use an AC voltmeter having 1000 ohms per volt or more sensitivity in the following manner. Connect a 1500 $\Omega$  10W resistor paralleled by a 0.15 $\mu$ F AC-type capacitor between an exposed metal part and a known good earth ground (water pipe, etc.). Measure the AC voltage across the resistor with the AC voltmeter. Move the resistor connection to each exposed metal part, particularly any exposed metal part having a return path to the chassis, and measure the AC voltage across the resistor. Now, reverse the plug in the AC outlet and repeat each measurement. Any voltage measured must not exceed 0.75V AC (r.m.s.). This corresponds to 0.5mA AC (r.m.s.).

However, in tropical area, this must not exceed 0.3V AC (r.m.s.). This corresponds to 0.2mA AC (r.m.s.).

# SPECIFIC SERVICE INSTRUCTIONS

## DISASSEMBLY PROCEDURE

### REMOVING THE REAR COVER

1. Unplug the power supply cord.
2. Remove the 5 screws marked (A) and a screw marked (B) as shown in Fig.1.
3. Withdraw the REAR COVER toward you.

#### [CAUTION]

- When reinstalling the rear cover, carefully push it inward after inserting the MAIN PWB into the rear cover groove.

### REMOVING THE MAIN PW BOARD

- After removing the rear cover.
1. Slightly raise the both sides of the MAIN PW BOARD by hand and remove the PWB STOPPER under the MAIN PW BOARD from the FRONT CABINET.
  2. Withdraw the MAIN PW BOARD backward.  
(If necessary, take off the wire clamp and connectors, etc.)

### REMOVING THE SPEAKER

- After removing the MAIN PW board.
1. By holding up the SPEAKER HOLDER marked (D) slightly and unlocking the claw, the SPEAKER HOLDER can be removed.  
Then you can remove the SPEAKER.

### CHECKING THE MAIN PW BOARD

1. To check the backside of the MAIN PW Board.
  - 1) Pull out the MAIN PWB. (Refer to REMOVING THE MAIN PWB).
  - 2) Erect the chassis vertically so that you can easily check the backside of the MAIN PW Board.

#### [CAUTION]

- When erecting the MAIN PWB, be careful so that there will be no contacting with other PW Board.
- Before turning on power, make sure that the CRT earth wire and other connectors are properly connected.

### WIRE CLAMPING AND CABLE TYING

1. Be sure clamp the wire.
2. Never remove the cable tie used for tying the wires together.  
Should it be inadvertently removed, be sure to tie the wires with a new cable tie.

## REPLACEMENT OF MEMORY ICs

### 1. MEMORY ICs

This TV uses memory ICs. In the memory ICs are memorized data for correctly operating the video and deflection circuits. When replacing memory ICs, be sure to use ICs written with the initial values of data.

### 2. PROCEDURE FOR REPLACING MEMORY ICs

#### (1) Power off

Switch the power off and unplug the power cord from the wall outlet.

#### (2) Replace ICs

Be sure to use memory ICs written with the initial data values.

#### (3) Power on

Plug the power cord into the wall outlet and switch the power on.

#### (4) Check and set SYSTEM CONSTANT SET:

- 1) Press the DISPLAY key and the PICTURE MODE key of the REMOTE CONTROL UNIT simultaneously.
- 2) The SERVICE MENU screen of Fig. 1 will be displayed.
- 3) While the SERVICE MENU on display, press the DISPLAY key and PICTURE MODE key simultaneously, and the SYSTEM CONSTANT SET screen of Fig. 2 will be displayed
- 4) Check the setting value of the SYSTEM CONSTANT SET of Table 1. If the value is different, select the setting item with the MENU  $\nabla/\Delta$  key, and set the correct value with the MENU -/+ key.
- 5) Press the DISPLAY key twice, and return to the normal screen.

#### (5) Receive channel of setting

Refer to the **OPERATING INSTRUCTIONS** and set the receive channels (channels preset) as described

#### (6) User Setting

Check the user setting value of Table 2, and if setting value is different, set the correct value.

For setting, refer to the **OPERATING INSTRUCTIONS**.

#### (7) Setting of SERVICE MENU

Verify the setting items of the SERVICE MENU of Table 3, and reset where necessary.

For setting, refer to the **SERVICE ADJUSTMENTS**.

# SERVICE ADJUSTMENTS

## BEFORE STARTING SERVICE ADJUSTMENT

1. There are 2 way of adjusting this TV: One is with the REMOTE CONTROL UNIT and the other is the conventional method using adjustment parts and components.
2. The setting (adjustment) using the REMOTE CONTROL UNIT is made on the basis of the initial setting values. The setting values which adjust the screen to the optimum condition can be different from the initial setting values.
3. Make sure that connection is correctly made to AC power source.
4. Turn on the power of the TV and measuring instrument for warming up for at least 30 minutes before staring adjustment.
5. If the receive or input signal is not specified, use the most appropriate signal for adjustment.
6. Never touch parts (such as variable resistors, transformers and condensers) not shown in the adjustment items of this service adjustment.

### 7. Preparation for adjustment (presetting):

Unless otherwise specified in the adjustment items, preset the following functions with the REMOTE CONTROL UNIT.

PICTURE MODE (VSM)	BRIGHT
VNR	OFF
TINT / COLOUR BRIGHT / CONT / SHARP	CENTER
OFF TIMER	OFF
AUTO SHUTOFF	OFF

## MEASUREMENT INSTRUMENT

### AND FIXTURES

1. DC voltmeter (or digital voltmeter)
2. Oscilloscope
3. Signal generator (Pattern generator) [PAL / SECAM / NTSC]
4. Remote control unit

## ADJUSTMENT ITEMS

Adjustment item	Adjustment item
B1 POWER SUPPLY	VIDEO/CHROMA (With DEF.) circuit adjustment
FOCUS adjustment	VSM PRESET setting
IF circuit adjustment	PURITY, CONVERGENCE

## BASIC OPERATION OF SERVICE MENU

### 1. TOOL OF SERVICE MENU OPERATION

Operate the SERVICE MENU with the REMOTE CONTROL UNIT.

### 2. SERVICE MENU ITEMS

With the SERVICE MENU, various settings (adjustments) can be made, and they are broadly classified in the following items of settings :

- 1. IF ..... This mode adjusts the setting values of the IF circuit.
- 2. V/C ..... This mode adjusts the setting values of the VIDEO/CHROMA circuit and DEFLECTION circuit.
- 3. VSM PRESET ..... For setting the values of STANDARD, SOFT and BRIGHT.  
(VSM : video status memory)

AV-A14M2  
AV-A14T2  
AV-A1432  
AV-1411EE

### 3. BASIC OPERATION OF SERVICE MENU

#### (1) How to enter SERVICE MENU

Press the DISPLAY key and the PICTURE MODE key of the REMOTE CONTROL UNIT simultaneously.  
The SERVICE MENU screen of Fig. 1 will be displayed.

#### (2) Selection of SUB MENU SCREEN

Press one of the keys 1 ~ 3 of the REMOTE CONTROL UNIT, and select the SUB MENU SCREEN (See Fig.2) from the SERVICE MENU.

SERVICE MENU → SUB MENU

1. IF
2. V/C
3. VSM PRESET

#### SERVICE MENU

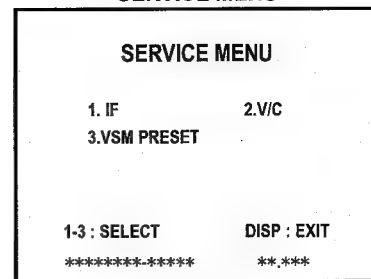

Fig. 1

#### SUB MENU SCREEN

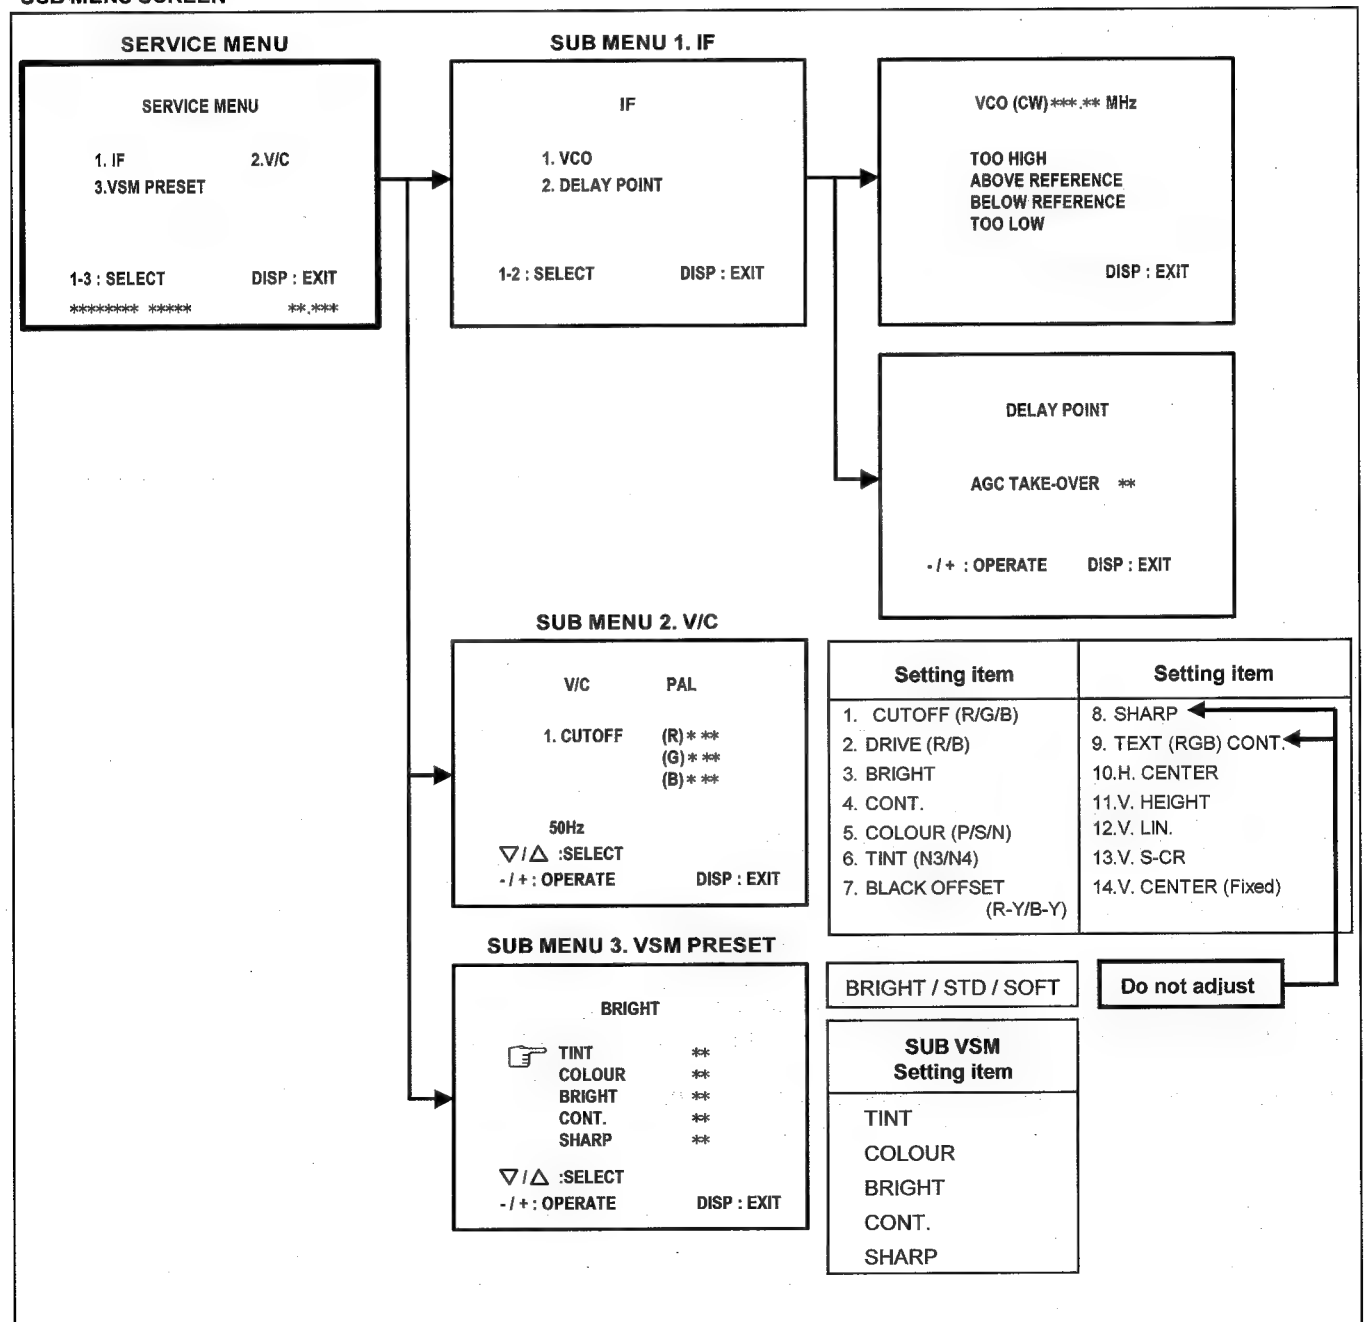

Fig. 2

### (3) Method of Setting

- \* Once the setting values are set, they are memorized automatically.
- \* It must not adjust without signal.

#### 1) 1. IF

##### [1. VCO]

- ① 1 Key ..... Select 1. IF.
- ② 1 Key ..... Select 1. VCO.(CW)
- ③ The VCO(CW) screen will be displayed in yellow when the AFC voltage is at a certain level and in blue when it is at other levels.
- ④ DISPLAY Key ..... When this is pressed, you will return to the **SERVICE MENU**.

##### [2. DELAY POINT]

- ① 1 Key ..... Select 1. IF.
- ② 2 Key ..... Select 2. DELAY POINT.
- ③ MENU - / + Key ..... Set (adjust) the setting values of the setting items.
- ④ DISPLAY Key ..... When this is pressed twice, you will return to the **SERVICE MENU**.

#### 2) 2. V/C and 3. VSM PRESET

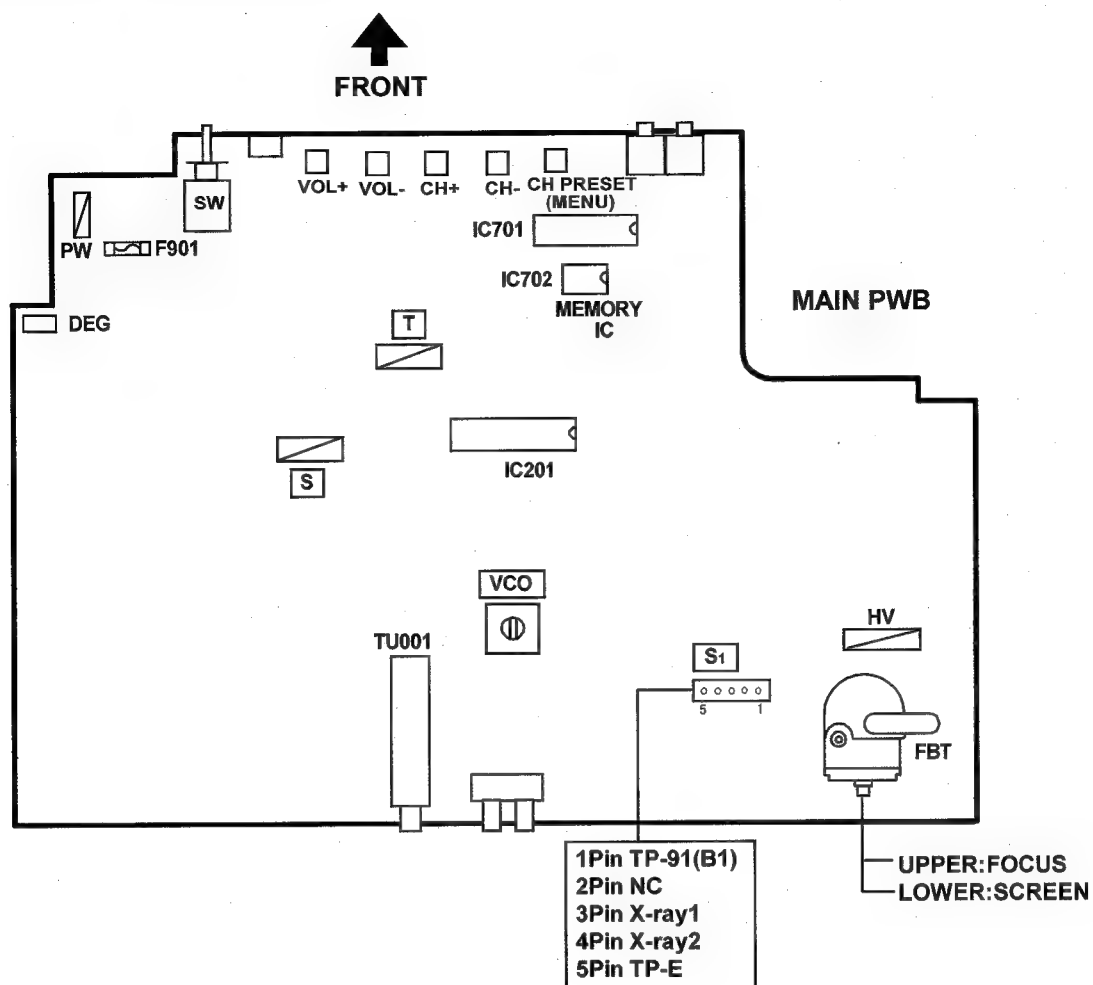

- ① 2 and 3 Keys ..... Select one from 2. V/C and 3. VSM PRESET
- ② MENU  $\Delta$  /  $\nabla$  key ..... Select setting items.
- ③ MENU - / + Key ..... Set (adjust) the setting values of the setting items. (Use the number keys of the REMOTE CONTROL UNIT for setting of WHITE BALANCE and BLACK OFFSET. For the setting, refer to each item concerned.)
- ④ DISPLAY Key ..... When this is pressed, you will return to the **SERVICE MENU**.

### (4) Release of SERVICE MENU

After completing the setting, return to the SERVICE MENU, then again press the DISPLAY key.

AV-A14M2

## PURITY, CONVERGENCE

### PURITY ADJUSTMENT

1. Demagnetize CRT with the demagnetizer.
2. Loosen the retainer screw of the deflection yoke.
3. Remove the wedges.
4. Input a green raster signal from the signal generator, and turn the screen to green raster.
5. Move the deflection yoke backward.
6. Bring the long lug of the purity magnets on the short lug and position them horizontally. (Fig.2)
7. Adjust the gap between two lugs so that the GREEN RASTER will come into the center of the screen. (Fig.3)
8. Move the deflection yoke forward, and fix the position of the deflection yoke so that the whole screen will become green.
9. Insert the wedge to the top side of the deflection yoke so that it will not move.
10. Input a crosshatch signal.
11. Verify that the screen is horizontal.
12. Input red and blue raster signals, and make sure that purity is properly adjusted.

Fig.1

Fig.2

Fig.3

### STATIC CONVERGENCE ADJUSTMENT

1. Input a crosshatch signal.
2. Using 4-pole convergence magnets, overlap the red and blue lines in the center of the screen (Fig.1) and turn them to magenta (red/blue).
3. Using 6-pole convergence magnets, overlap the magenta (red/blue) and green lines in the center of the screen and turn them to white.
4. Repeat 2 and 3 above, and make best convergence.

Fig.1

### DYNAMIC CONVERGENCE ADJUSTMENT

1. Move the deflection yoke up and down and overlap the lines in the periphery. (Fig. 2)
2. Move the deflection yoke left to right and overlap the lines in the periphery. (Fig. 3)
3. Repeat 1 and 2 above, and make best convergence.

Fig.2

Fig.3

- After adjustment, fix the wedge at the original position.  
Fasten the retainer screw of the deflection yoke.  
Fix the 6 magnets with glue.

## SELF CHECK FUNCTIONS

### 1. Outline

This model has self check functions given below. When an abnormality has been detected, the SUB POWER is turned off and the LED flashes to inform of the failure. An abnormality is detected by the signal input state of the control line connected to the microcomputer.

### 2. Self check items

Check item	Details of detection	Method of detection	State of abnormality
Over-current protection	An over-current on the LOW B line is detected.	The main microcomputer detects the possible abnormality at 30-msec. intervals and judges the results in every 16 time. Of the 16 times, if NG is detected more than 9 times, it is judged that there is an abnormality	When an abnormality has been detected, the SUB-POWER is turned off. While the SUB-POWER is being turned off, the power key of the remote controller is not operational until the power code is taken out and put in again.
CRT NECK protection	Operation of Vertical deflection circuit.	DITTO	DITTO
X-ray protection	Operation of X-ray protection circuit	DITTO	DITTO

### 3. Self check indicating function

At about 3 seconds after the power is turned on, the self-check function starts.

In the case where an abnormality has been detected within the subsequent 2 seconds, the LED flashes, but the SUB-POWER is not turned off.

When an abnormality has been detected at about 5 seconds after the power is turned on, the SUB POWER is turned off immediately and the LED flashes.

#### [ Indication by LED ]

Item	LED flashing intervals	Priority of detection
① Over-current protection	At 0.25-second intervals	1
② CRT NECK protection / X-ray protection	At 0.5-second intervals	2

Note : In case of ① + ②, the item ① is indicated

#### [NOTE]

**X-RAY** : There are two different types of models with and without X-RAY PROTECTION.

**LED** : There are three kinds of LEDs — ON TIMER LED, POWER / ON TIMER LED and ECO LED. Each model has at least one of the LEDs depending on the models. In the models with two LEDs, they flash simultaneously. In the model with one LED, it flashes independently. (The POWER / ON TIMER LED flashes in red and green by turns.)

# PARTS LIST

## CAUTION

- The parts identified by the  $\Delta$  symbol are important for the safety. Whenever replacing these parts, be sure to use specified ones to secure the safety.
- The parts not indicated in this Parts List and those which are filled with lines — in the Parts No. columns will not be supplied.
- P. W. Board Ass'y will not be supplied, but those which are filled with the Parts No. in the Parts No. columns will be supplied.

## ABBREVIATIONS OF RESISTORS, CAPACITORS AND TOLERANCES

RESISTORS		CAPACITORS	
C R	Carbon Resistor	C CAP.	Ceramic Capacitor
F R	Fusible Resistor	E CAP.	Electrolytic Capacitor
P R	Plate Resistor	M CAP.	Mylar Capacitor
V R	Variable Resistor	HV CAP.	High Voltage Capacitor
HV R	High Voltage Resistor	MF CAP.	Metalized Film Capacitor
MF R	Metal Film Resistor	MM CAP.	Metalized Mylar Capacitor
MG R	Metal Glazed Resistor	MP CAP.	Metalized Polystyrol Capacitor
MP R	Metal Plate Resistor	PP CAP.	Polypropylene Capacitor
OM R	Metal Oxide Film Resistor	PS CAP.	Polystyrol Capacitor
CMF R	Coating Metal Film Resistor	TF CAP.	Thin Film Capacitor
UNF R	Non-Flammable Resistor	MPP CAP.	Metalized Polypropylene Capacitor
CH V R	Chip Variable Resistor	TAN. CAP.	Tantalum Capacitor
CH MG R	Chip Metal Glazed Resistor	CH C CAP.	Chip Ceramic Capacitor
COMP. R	Composition Resistor	BP E CAP.	Bi-Polar Electrolytic Capacitor
LPTC R	Linear Positive Temperature Coefficient Resistor	CH AL E CAP.	Chip Aluminum Electrolytic Capacitor
		CH AL BP CAP.	Chip Aluminum Bi-Polar Capacitor
		CH TAN. E CAP.	Chip Tantalum Electrolytic Capacitor
		CH AL BP E CAP.	Chip Tantalum Bi-Polar Electrolytic Capacitor

## INSTRUCTIONS

Thank you for purchasing this JVC colour television.  
To ensure your complete understanding, please read this manual thoroughly before operation.

### WARNING:

TO PREVENT FIRE OR SHOCK HAZARD, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

### CAUTION:

- TO ENSURE PERSONAL SAFETY, OBSERVE THE FOLLOWING RULES REGARDING THE USE OF THIS TV.
- Operate only from the power source specified on the TV.
- Avoid damaging the power plug and power cord.
- Avoid improper installation and never position this TV where good ventilation is unattainable. When installing this TV distance recommendations must be maintained between the floor and wall, as well as installment in a tightly enclosed area or piece of furniture. Adhere to the minimum distance guidelines shown for safe operation.
- Do not allow objects or liquid into the cabinet openings.
- In the event of a fault, unplug this TV and call a service technician. Do not attempt to repair it yourself or remove the rear cover.
- When you don't use this TV for a long period of time, be sure to disconnect the power plug from the AC outlet.

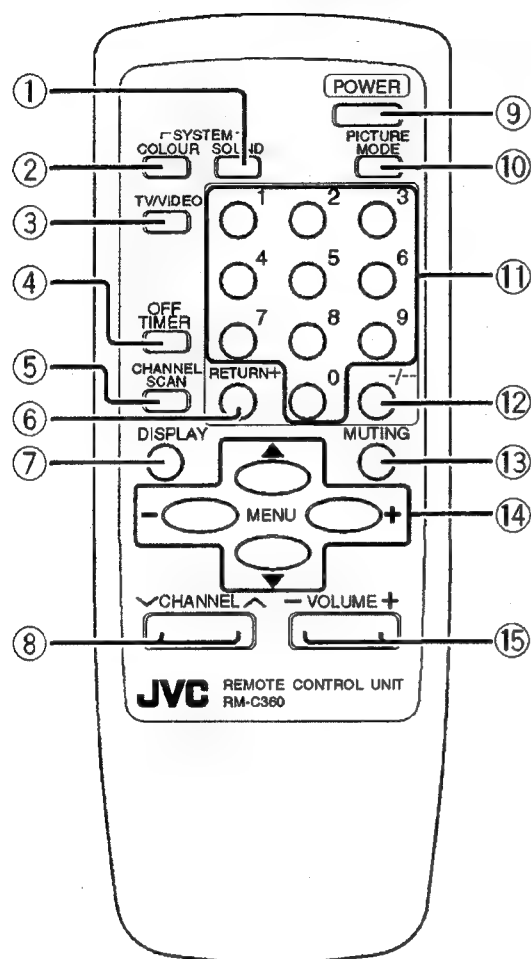

In principle, the operation of the local models is carried out in the same method as for the corresponding basic models. For the operating method of each local model, use the INSTRUCTION MANUAL for the basic models listed below.

# Preparation

## 1. Connecting the aerial and external devices

### Notes:

- For further details, refer to manuals provided with the devices you are connecting.
- Connecting cables are not supplied.
- The front and rear AUDIO/VIDEO input jacks are directly connected so that input to either jack is output through both. You cannot provide input to both the front and rear jacks at the same time. Disconnect one input, or use one of the jacks as an output jack only (for monitoring or recording).
- The rod aerial and matching aerial adapter is supplied with the AV-A14M2/AV-A14T2/AV-K14M2/AV-K14T2.

### ■ Connecting the aerial and VCR

If not connecting a VCR (video cassette recorder), do ① → ② or ② only.

If connecting a VCR, proceed ① → ② → ③.

- You can view images from the VCR without doing ③. For details, see "To view images from a VCR connected to the TV with only an aerial cable" on page 14.

#### To install rod aerial:

Install into the top-rear aerial holder. Once installed, it cannot be removed.

#### VHF/UHF outdoor aerial

## To set up matching aerial adapter

## ■ Connecting other external devices

## 2. Connecting the power cord

**Insert the Power plug into an AC outlet.**

### 3. Inserting batteries into the remote control

Correctly insert two batteries, observing the  $\oplus$  and  $\ominus$  polarities, inserting the  $\ominus$  end first.

**CAUTION:**

- Follow the cautions printed on the batteries.**
- Notes:** Use AA/R6/UM-3 dry cell batteries. Battery life is approximately six months to one year depending on frequency of use. If the remote control operates erratically, replace the batteries. We recommend that you use the supplied batteries initially and replace them as soon as operation becomes erratic. The supplied batteries are for testing, not regular use.

#### 4. Turning your TV on

- 1. Press the Main power button on the TV to turn the TV's main power on.**

**For AV-A14M2 and AV-A14T2:**

The POWER/ON TIMER lamp lights green (main power on).

**For other models:**

**The POWER lamp lights red (main power on).**

**If image dose not appear:**

Your TV is in the standby mode. Press the POWER button on the remote control to turn your TV on.

- You can also turn on your TV by pressing the CHANNEL V/Λ button on your TV.

**To turn your TV off:**

Press the POWER button on the remote control. Your TV enters the standby mode.

**To turn the TV's main power off:**

Press the Main power button on the TV.

For AV-A14M2 and AV-A14T2:

The POWER/ON TIMER lamp goes off.

For other models:

The POWER lamp goes off.

## Preparation

## 5. Selecting the on-screen language

You can select one of three languages for the on-screen display. The displayed menus on the screen are described in the selected language.

In this manual, on-screen descriptions are given in English. Select **ENGLISH**.

- For details on menu operations using the front control buttons on the TV, see "Menu operations using the front control buttons on the TV" on page 21.

1. Press MENU  $\blacktriangle/\blacktriangledown$  to display the following menu.  
*The following menu is displayed in one of three languages.*
2. Press MENU  $\blacktriangle/\blacktriangledown$  to select the second item on the menu.
3. Press MENU  $-/+$  to select ENGLISH.

*The menu is displayed in English.*

MENU	1
INPUT	TV
LANGUAGE	ENGLISH
AUTO ON PRESET	
MANUAL CH PRESET	
VNR	OFF
SELECT BY ▲	EXIT BY
OPERATE BY →	(DISP)PLAY

- 4. Proceed to "6. Presetting TV stations" on the following page.**

- If you want to complete operations at this stage, press the **DISPLAY** button to turn the menu display off.

**Note:**

- If a different menu is displayed, repeatedly press the MENU  button until this menu is displayed.

## 6. Presetting TV stations

To view a TV programme, you must first preset TV stations to channels on the TV. This TV has 100 channels (channel 1 to 99 and channel AV). You can choose between two functions, the Auto Channel Preset and Manual Channel Preset and preset TV stations to channels on TV.

### Note:

- After you have finished presetting, you can set undesired channels to be skipped over, see "Skip" on page 11.

- For details on menu operations using the front control buttons on the TV, see "Menu operations using the front control buttons on the TV" on page 21.

## Auto Channel Preset

You can automatically preset all TV stations that can be received on your TV to channels in one simple operation.

### Notes:

- When you use this function, no station is preset to the channel AV. Channel AV is offered for viewing images from a VCR connected to your TV with only an aerial cable. For more details, see "To view images from a VCR connected to the TV with only an aerial cable" on page 14.
- If the Auto Channel Preset does not work well, preset TV stations manually. For details, see "Manual Channel Preset" on page 9.

- Press MENU  $\Delta/\nabla$  to select AUTO CH PRESET in the "MENU 1" menu.

MENU	1	TV
INPUT	LANGUAGE	ENGLISH
CAUTO CH PRESET	MANUAL CH PRESET	OFF
VNR	SELECT BY $\Delta/\nabla$	EXIT BY $\square$
OPERATE BY $\rightarrow$		DISP. $\square$

- Press MENU  $\Delta/\nabla$  to start the Auto Channel Preset function.  
">>> ON SEARCH" is displayed on the screen.

When you have finished presetting all TV channels that can be received on your TV, the display will go out and the Auto Channel Preset function will end.

- To stop the Auto Channel Preset, press the MENU  $\Delta/\nabla$  button.

## Manual Channel Preset

You can manually preset the desired TV stations to the desired channels.

- Press MENU  $\Delta/\nabla$  to select MANUAL CH PRESET in the "MENU 1" menu.

MENU	1	TV
INPUT	LANGUAGE	ENGLISH
CAUTO CH PRESET	MANUAL CH PRESET	OFF
VNR	SELECT BY $\Delta/\nabla$	EXIT BY $\square$
OPERATE BY $\rightarrow$		DISP. $\square$

### To display this menu:

Repeatedly press the MENU  $\Delta/\nabla$  button until it is displayed.

- Press MENU  $\Delta/\nabla$ .

The sub-menu is displayed.

MANUAL	CH	NO
FINE	SKIP	B/S
SOUND	SYSTEM	
EXIT		
SELECT BY $\Delta/\nabla$	PR 1 VL	
PROGRAM BY $\rightarrow$	EXIT BY	
SEARCH BY VOL $\rightarrow$		DISP. $\square$

- The channel No. is displayed as a PR No. For example, channel 1 will be displayed as PR 1. However, channel AV will be displayed as AV.

- Press MENU  $\Delta/\nabla$  to select the channel No. to be preset.

- Press VOLUME  $\Delta/\nabla$  to start selection of the TV station.  
">>> ON SEARCH" is displayed on the screen.

When a TV station is received, the ">>>" or "<<<" display goes out, and the TV station is preset to the currently selected channel No.

- If you have selected the wrong TV station for preset, repeatedly press the VOLUME  $\Delta/\nabla$  button until the desired TV station is selected.
- To stop the Manual Channel Preset, press any button other than the VOLUME  $\Delta/\nabla$  button.

### If the picture is not clear:

Use the Fine function to fine-tune the TV station.

- Press MENU  $\Delta/\nabla$  to select FINE.

MANUAL	CH	NO
FINE	SKIP	B/S
SOUND	SYSTEM	
EXIT		
SELECT BY $\Delta/\nabla$	PR 3 VL	
PROGRAM BY $\rightarrow$	EXIT BY	
FINE BY VOL $\rightarrow$		DISP. $\square$

- Hold VOLUME  $\Delta/\nabla$  down to fine-tune the TV station so that the best image is displayed on screen.  
">" or "<" indicates that the TV station is being fine-tuned.

(Continued on next page)

## Preparation

5. Press MENU  $\Delta/\nabla$  to select SOUND SYSTEM.

MANUAL	NO
FINE	B/G
SKIP	
SOUND SYSTEM	
EXIT	
SELECT BY $\nabla$	PR 3 VL
PROGRAM BY $\rightarrow$	EXIT BY
CHANGE BY VOL $\rightarrow$	DISP/AV

6. Press VOLUME  $-/+$  to select the appropriate sound system.

- For the sound systems in each country or region, refer to the table "The Broadcasting systems of Each Country or Region" below.

7. Press MENU  $\Delta/\nabla$  to select MANUAL.

8. Repeat steps 3 to 7 if you want to preset another TV station to a channel.

9. Press DISPLAY to turn the display off.

**The Broadcasting Systems of Each Country or Region**

Area	Country or Region	System	
		Colour	Sound
Asia, Middle East	Bahrain, Kuwait, Oman, Qatar, United Arab Emirates, Yemen, etc.	PAL	B/G
	Indonesia, Malaysia, Singapore, Thailand, India, etc.

## Preparation

### ■ Skip

When selecting channels, you can set undesired channels to be skipped. Channels set to be skipped cannot be selected by the CHANNEL  $\nabla/\Delta$  buttons nor the CHANNEL SCAN button.

- Channels to which a station has not been preset are automatically set to be skipped.

1. Press MENU  $\Delta/\nabla$  to display the "MENU 1" menu.

MENU	1
INPUT	TV
LANGUAGE	ENGLISH
AUTO CH PRESET	
MANUAL CH PRESET	
VNR	OFF
SELECT BY $\nabla$	EXIT BY
OPERATE BY $\rightarrow$	DISP/AV

- If a different menu is displayed, repeatedly press the MENU  $\Delta/\nabla$  button until this menu is displayed.

2. Press MENU  $\Delta/\nabla$  to select MANUAL CH PRESET.

MENU	1
INPUT	TV
LANGUAGE	ENGLISH
AUTO CH PRESET	
MANUAL CH PRESET	
VNR	OFF
SELECT BY $\nabla$	EXIT BY
OPERATE BY $\rightarrow$	DISP/AV

3. Press MENU  $-/+$ .

The sub-menu is displayed.

MANUAL	NO
FINE	B/G
SKIP	
SOUND SYSTEM	
EXIT	
SELECT BY $\nabla$	PR 1 VL
PROGRAM BY $\rightarrow$	EXIT BY
SEARCH BY VOL $\rightarrow$	DISP/AV

4. Press MENU  $\Delta/\nabla$  to select SKIP.

MANUAL	NO
FINE	B/G
SKIP	
SOUND SYSTEM	
EXIT	
SELECT BY $\nabla$	PR 1 VL
PROGRAM BY $\rightarrow$	EXIT BY
YES/NO BY VOL $\rightarrow$	DISP/AV

Channel No.

- The channel No. is displayed as a PR No. For example, channel 1 will be displayed as PR 1. However, channel AV will be displayed as AV.

5. Press MENU  $-/+$  to select the channel you want to skip.

6. Press VOLUME  $-/+$  to select YES.

The channel you selected is set to be skipped.

MANUAL	YES
FINE	B/G
SKIP	
SOUND SYSTEM	
EXIT	
SELECT BY $\nabla$	PR 5 VL
PROGRAM BY $\rightarrow$	EXIT BY
YES/NO BY VOL $\rightarrow$	DISP/AV

To cancel the Skip: select NO.

7. Repeat steps 5 and 6 if you want to set another channel to skip.

8. Press DISPLAY to turn the display off.

## Viewing a Television Programme

### Using the remote control

1. Press **POWER** to turn your TV on.

#### Notes:

- If your TV does not turn on, press the Main power button on the TV then press the **POWER** button again.
- You can also turn on your TV by pressing any of the following buttons;
  - the **CHANNEL V/A** button
  - the **Number** buttons
  - the **TV/VIDEO** button

2. Select a **PR** channel.

- **Up/ down selection**  
Press **CHANNEL V/A**.

- **Direct selection**

1. Repeatedly press the **-/-** button to select the desired mode.

#### - : 1-digit mode

To select a channel with a 1-digit number.

#### - - : 2-digit mode

To select a channel with a 1-digit number or a 2-digit number.

2. Press the **Number** buttons to select a channel.

#### For 1-digit mode:

(example)  
Channel 6 → Press 6.

#### For 2-digit mode:

(example)  
Channel 6 → Press 0, 6.  
Channel 16 → Press 1, 6.

- When you want to select channel AV, press 0 in 1-digit mode or 00 in 2-digit mode.

## Viewing a Television Programme

### ■ Channel Scan selection

You can search for the channel you want to view while scanning all of the channels that can be viewed on this TV.

1. Press **CHANNEL SCAN**.

*Channels will be scanned in channel No. order.*

2. When the channel that you want to view appears, press **CHANNEL SCAN** again before scanning for the next channel begins.

#### Note:

- Up/down and Channel Scan selections cannot be selected for channels to which the Skip has been set to YES. (See "Skip" on page 11.)

#### If the colour is abnormal:

Repeatedly press the **COLOUR SYSTEM** button to select the appropriate colour system. For details, see "Colour System" on page 15.

3. Press **VOLUME +/-** to adjust the sound.

*To temporarily render the sound inaudible:*  
Press the **MUTING** button.

- To return the sound, press the **MUTING** button again.

#### If the sound is abnormal:

Repeatedly press the **SOUND SYSTEM** button to select the appropriate sound system. For details, see "Sound System" on page 15.

4. To turn your TV off, press **POWER**.

#### Note:

- We recommend that you press the Main power button on the TV to turn the main power off if you do not plan to use your TV for a long time or if you wish to save energy.

## Using the front panel buttons on the TV

1. Press **CHANNEL V/A** to turn your TV on.

#### Note:

- If your TV does not turn on, press the Main power button and then press the **CHANNEL V/A** button again.

2. Press **CHANNEL V/A** to select a channel.

3. Press **VOLUME +/-** to adjust the sound.

4. To turn your TV off, press the Main power button to turn the main power off.

For AV-A14M2 and AV-A14T2:  
The **POWER/ON TIMER** lamp goes off.

For other models:

The **POWER** lamp goes off.

- If you press the Main power button again, your TV turns on immediately. Step 1 is no longer required.

## Viewing Images from an External Device

You can view images from VCRs or other external devices connected to your TV.

1. Press **TV/VIDEO** to select the **VIDEO** mode.

### TV mode:

This mode is for viewing TV programmes. Press the **TV/VIDEO** button, or press the **CHANNEL/V/A** button, or press the number buttons to return to this mode.

**To view images from a VCR connected to the TV with only an aerial cable:**

Your VCR must be preset to the channel **AV** of this TV.

Thoroughly read the manual of your VCR, and preset your VCR to the channel **AV** using the Manual Channel Preset function on page 9.

As a result, you can view images from your VCR when you select the channel **AV** in the **TV** mode.

### If the colour is abnormal:

Repeatedly press the **COLOUR SYSTEM** button to select the appropriate colour system. For details, see "Colour System" on page 15.

**To select the VIDEO mode using the front control buttons on the TV:**

When not using the remote control, you can select the **VIDEO** mode using the **MENU** buttons on the TV.

1. Repeatedly press the **MENU** button on the TV to select **INPUT** from "MENU 1" menu.

2. Press the **MENU +** button on the TV.

TV mode changes to **VIDEO** mode.

### Note:

- For details, see "Menu operations using the front control buttons on the TV" on page 21.

## Sound and Picture

### Colour System

If the colour is abnormal, select the appropriate colour system. Each press of the **COLOUR SYSTEM** button changes the colour system as follows.

**In TV mode (channel 1 to 99 and AV):**

<AV-A14M2/AV-K14M2/AV-A21M2/

AV-K21M2>

→ **AUTO** → **PAL** → **SECAM** → **NTSC4.43** ← **NTSC3.58** ←

<AV-A14T2/AV-K14T2/AV-A21T2/

AV-K21T2>

→ **AUTO** → **PAL** → **SECAM** → **NTSC4.43** ← **NTSC3.58** ←

<AV-A14T2/AV-K14T2/AV-A21T2/

AV-K21T2>

→ **AUTO** → **PAL** → **SECAM** → **NTSC4.43** ← **NTSC3.58** ←

**In VIDEO mode:**

→ **AUTO** → **PAL** → **SECAM** → **NTSC4.43** ← **NTSC3.58** ←

### AUTO:

Automatic colour system selection.

### Notes:

- For the colour systems in each country or region, see the table "The Broadcasting Systems of Each Country or Region" on page 10.
- If the colour is abnormal even though you selected **AUTO**, change the appropriate colour system manually.

### Sound System

If the sound is abnormal, select the appropriate sound system. Each press of the **SOUND SYSTEM** button changes the sound system as follows.

<AV-A14M2/AV-K14M2/AV-A21M2/

AV-K21M2>

→ **B/G** → **I** → **D/K** → **M** →

<AV-A14T2/AV-K14T2/AV-A21T2/

AV-K21T2>

→ **B/G** → **I** → **D/K** → **M** →

<AV-A14T2/AV-K14T2/AV-A21T2/

AV-K21T2>

→ **B/G** → **I** → **D/K** → **M** →

### Notes:

- For the sound systems in each country or region, see the table "The Broadcasting Systems of Each Country or Region" on page 10.
- You cannot select any sound system when in **VIDEO** mode.

### Picture Mode

You can select one of three picture adjustment modes.

Repeatedly press the **PICTURE MODE** button to select the desired mode.

#### BRIGHT:

Heightens contrast and sharpness.

#### STANDARD:

Standardizes picture adjustments.

#### SOFT:

Softens contrast and sharpness.

### Note:

- Pressing the **PICTURE MODE** button returns all the picture settings in the "MENU 3" menu to their default settings.

## Picture Adjustment

You can adjust the picture as you like.

- For details on menu operations using the front control buttons on the TV, see "Menu operations using the front control buttons on the TV" on page 21.

1. Press **MENU**  $\Delta/\nabla$  to display a menu.
2. Press **MENU**  $\Delta/\nabla$  repeatedly to display the desired menu.

Display the "MENU 3" menu.

MENU 3	
TINT	3
COLOUR	.....
BRIGHT	.....
CONT.	.....
SHARP	.....
SELECT BY $\Delta/\nabla$	EXIT BY $\Delta/\nabla$
OPERATE BY $\Delta/\nabla$	DISP. BY $\Delta/\nabla$

3. Press **MENU**  $\Delta/\nabla$  to select an item and press **MENU**  $\Delta/\nabla$  to adjust it.

-	Item	+
Reddish	TINT (tint)	Greenish
Lighter	COLOUR (colour depth)	Deeper
Darker	BRIGHT (brightness)	Brighter
Lower	CONT. (contrast)	Higher
Softer	SHARP (sharpness)	Sharper

- Note:**
- TINT (tint) is displayed only when viewing images from NTSC3.58 or NTSC4.43 colour systems.

4. Press **DISPLAY** to turn the display off.

## Other Features

### Display

You can continuously display the current channel number or VIDEO mode on the screen.

Press the **DISPLAY** button.

To turn the display off, press the **DISPLAY** button again.

- Note:**
- When selecting a channel or VIDEO mode with no input signal, indication of selected channel or VIDEO mode becomes fixed on the screen.

### Off Timer

You can set this TV to turn off automatically within a specified period of time.

Repeatedly press the **OFF TIMER** button to select the period of time.

- You can set the period of time a maximum of 120 minutes in 10 minute increments.
- 1 minute before the Off Timer turns off the TV, "GOOD NIGHT!" displays.

**To display the remaining time:**  
Press the **OFF TIMER** button once.

**To cancel the Off Timer:**  
Press the **OFF TIMER** button to return the period of time to 0.

- Note:**
- The Off Timer will not turn off the TV's main power.

### Return +

By setting a channel to "Return channel", you can return to that channel with one touch.

1. Press **CHANNEL V/A** or the **Number** buttons to select a channel to set to "Return channel".
2. Press **RETURN +** for more than 3 seconds continuously. "RETURN PLUS PROGRAMMED!" appears.

3. When viewing another channel, press **RETURN +**. The channel changes to the channel set for "Return channel".

**To cancel the channel set for "Return channel":**

Press the **RETURN +** button for more than 3 seconds continuously.  
• "RETURN PLUS CANCELLED!" appears.

- Notes:**
- When you turn the TV off, the "Return channel" setting will be canceled.
  - When you press the **RETURN +** button while viewing the channel set for "Return channel", the channel changes to the previously viewed channel.
  - When you press the **RETURN +** button while in a VIDEO mode, the mode switches to TV mode. To return to the channel set for "Return channel", press the **RETURN +** button again.

**When there is no setting for "Return channel":**  
When you press the **RETURN +** button, the channel changes to the previously viewed channel.

- For details on menu operations using the front control buttons on the TV, see "Menu operations using the front control buttons on the TV" on page 21.

## Blue Back

You can mute the sound and change the picture into a blue screen while no signals come into the TV, or when the input signals are unstable.

1. Repeatedly press MENU  $\Delta/\nabla$  to display the "MENU 2" menu, and press MENU  $\Delta/\nabla$  to select BLUE BACK.

MENU	2	OFF
AUTO SHUTOFF	ON	OFF
ON TIMER	PR 1	0:00
BLUE BACK	OFF	OFF
PROGRAM BY $\rightarrow$	SELECT BY $\nabla/\Delta$	EXIT BY $\rightarrow$
OPERATE BY VOL $\rightarrow$	DISP. $\rightarrow$	

2. Press MENU  $\Delta/\nabla$  to select "ON" or "OFF."

ON:

Activates the Blue Back.

OFF:

Cancels the Blue Back.

Notes:

- To view a broadcast even when the reception signal is poor, set the Blue Back to OFF.
- Even when the Blue Back is set to OFF the sound may not be audible.
- The Blue Back function does not operate in VIDEO mode

## On Timer

Your TV will automatically turn on and tune into the channel you want after a certain period of time you have specified.

1. Repeatedly press MENU  $\Delta/\nabla$  to display the "MENU 2" menu, and Press MENU  $\Delta/\nabla$  to select ON TIMER.

MENU	2	OFF
AUTO SHUTOFF	ON	OFF
ON TIMER	PR 1	0:00
BLUE BACK	OFF	OFF
PROGRAM BY $\rightarrow$	SELECT BY $\nabla/\Delta$	EXIT BY $\rightarrow$
OPERATE BY VOL $\rightarrow$	DISP. $\rightarrow$	

2. Press MENU  $\Delta/\nabla$  to select a channel you want to view when the TV turns on.

Note:

- You cannot select the channel AV, the VIDEO modes, and the channels for which the Skip is set (See "Skip" on page 11).

3. Press VOLUME  $\Delta/\nabla$  to select the period of time after which you want to turn on the TV.

For AV-A14M2 and AV-A14T2:

The POWER/ON TIMER lamp changes from green to red and the On Timer starts.

For other models:

The ON TIMER lamp lights and the On Timer starts.

- Each time you press the button, the period of time changes in 15 minute intervals (up to 12 hours).

MENU	2	OFF
AUTO SHUTOFF	ON	OFF
ON TIMER	PR 3	11:00
BLUE BACK	OFF	OFF
PROGRAM BY $\rightarrow$	SELECT BY $\nabla/\Delta$	EXIT BY $\rightarrow$
OPERATE BY VOL $\rightarrow$	DISP. $\rightarrow$	

3. Press DISPLAY to turn the display off.

### To cancel the On Timer:

Press the VOLUME  $\Delta/\nabla$  button to return the period of time to "0:00".

4. Press DISPLAY to turn the display off.
5. Press POWER to turn the TV off.

POWER/ON TIMER lamp or ON TIMER lamp will stay lit.

Notes:

- If you turn off the TV's main power by pressing the Main power button, the On Timer setting is canceled.
- If you do not turn off the TV after starting the On Timer, once the time set for the On Timer is reached, the channel will automatically switch to the channel set for the On Timer.

**While the On Timer is operating:**  
The POWER/ON TIMER lamp or ON TIMER lamp lights.

**When the time set for the On Timer is reached:**

The TV automatically turns on and the channel set for the On Timer is displayed.

Notes:

- For safety reasons the TV will automatically turn off if no operations are made within approximately two hours after the TV is turned on with the On Timer.
- The Off Timer and Auto Shutoff have priority over the On Timer.

## Auto Shutoff

You can set your TV to turn off if no signals are received for about 15 minutes or longer after the end of a broadcast.

- For details on menu operations using the front control buttons on the TV, see "Menu operations using the front control buttons on the TV" on page 21.

- Press MENU  $\Delta/\nabla$  to display the "MENU 2" menu, and press MENU  $\Delta/\nabla$  to select AUTO SHUTOFF.

MENU	2
OFF	OFF
ON TIMER	PR 1 0:00
BLUE BACK	OFF
SELECT BY $\nabla \Delta$	EXIT BY $\Delta/\nabla$
OPERATE BY $\rightarrow$	DISPLAY

- Press MENU  $\Delta/\nabla$  to select "ON" or "OFF".

MENU	2
ON	ON
AUTO SHUTOFF	PR 1 0:00
BLUE BACK	OFF
SELECT BY $\nabla \Delta$	EXIT BY $\Delta/\nabla$
OPERATE BY $\rightarrow$	DISPLAY

**ON:**

Activates the Auto Shutoff.

**OFF:**

Cancels the Auto Shutoff.

## Menu operations using the front control buttons on the TV

You can operate functions in menus using the front control buttons on the TV without having to use the remote control.

- Press MENU to display the menu.
- Press MENU  $\Delta/\nabla$  or VOLUME  $\Delta/\nabla$  to carry out the desired operation.

*If the desired menu is not displayed:*

Repeatedly press the MENU button until the desired menu is displayed.

- Repeatedly press MENU to select the desired function or item.

*To select a function or item above the currently selected function or menu:*

Repeatedly press the MENU button to proceed to another menu, and then repeatedly press the MENU button again to return to the original menu. Then select the function or item.

- Press VOLUME  $\Delta/\nabla$  to turn the menu display off.
- If the sub-menu is displayed:*  
The sub-menu cannot be turned off by the VOLUME  $\Delta/\nabla$  button when it is displayed. Follow the procedure below to turn the sub-menu display off.

- Press MENU to select EXIT.

MANUAL	NO
FINE	B/G
SKIP	SOUND SYSTEM
EXIT	PR 1 VL
SELECT BY $\nabla \Delta$	EXIT BY $\Delta/\nabla$
PROGRAM BY $\rightarrow$	EXIT BY $\Delta/\nabla$
EXIT	EXIT BY $\Delta/\nabla$

- Press VOLUME  $\Delta/\nabla$  to turn the sub-menu display off.

# Troubleshooting

**Important:** Review all the instructions in this manual.

Problem	Action
Cannot turn TV on	Press the Main power button (see p.6). Insert the power plug in an AC outlet.
No picture nor sound	Press the TV/VIDEO button to select the correct mode (see p.14). Check the aerial connections.
Remote control inoperable	Replace the batteries (see p.6).
The TV turns on suddenly.	The TV will automatically turn on when the On Timer is operated (see p.19).
The TV turns off suddenly.	The TV will automatically turn off in the following cases. <ul style="list-style-type: none"> <li>• When the Off Timer or Auto Shutoff is operated (see p.17 and p.20).</li> <li>• When no operations are made within approximately two hours after the TV was turned on with the On Timer (see p.19).</li> </ul>
Abnormal sound	Select the appropriate sound system (see p.15).
Abnormal colour	Adjust the colour and brightness (see p.16). Select the appropriate colour system (see p.15). Set the Picture mode to STANDARD (see p.15).
Lines or streaks in picture (interference)	Move the components apart until the interference disappears. Reposition the aerial.
Spotted picture (crosstalk)	Move the aerial away from the source of interference. Replace the aerial cable with a coaxial cable, which is less prone to interference.
Double picture (ghost)	Reposition the aerial. Replace with an aerial with good directionality.
Snowy picture (image noise)	Check the aerial connection and aim it correctly. Replace or repair the aerial.
The TV channel changes suddenly.	The channel will automatically be changed when the On Timer operates (see p.19).
The screen turns blue	Is the Blue Back set to ON (see p.18) ?

## The following are normal occurrences and are not the result of TV malfunctions:

- When you touch the CRT surface, you might feel a slight charge of static electricity. This is because the CRT contains static electricity; it does not affect the human body.
- Your TV may emit a crackling sound due to a sudden change in temperature. There is no problem unless the picture or sound is abnormal.
- When a still bright image (of a white dress, for example) appears on the screen, the image may be coloured. This problem occurs in all CRTs, and when the bright image disappears, the colouration also disappears.
- This TV is equipped with a microcomputer that may operate abnormally due to interference from external devices. If this happens, press the Main power button to turn the main power off and disconnect the power plug from the AC outlet. Then, reconnect the power plug to the AC outlet and press the Main power button again.

# AV-A14M2(L) AV-A14M2(L)-A AV-A14T2(L) AV-A1432(L)-SC AV-A14M2(L)-HK AV-A14M2(L)U AV-A14T2(L)-A AV-1411EE(L) STANDARD CIRCUIT DIAGRAM

## NOTE ON USING CIRCUIT DIAGRAMS

### 1. SAFETY

The components identified by the  $\Delta$  symbol and shading are critical for safety. For continued safety replace safety critical components only with manufactures recommended parts.

### 2. SPECIFIED VOLTAGE AND WAVEFORM VALUES

The voltage and waveform values have been measured under the following conditions.

- |   |  |
|---|--|
| (1) Input signal  | : PAL Colour bar signal  |
| (2) Setting positions of each knob/button and variable resistor | : Original setting position when shipped   |
| (3) Internal resistance of tester                               | : DC 20k $\Omega$ /V   |
| (4) Oscilloscope sweeping time                                  | : H $\Rightarrow$ 20 $\mu$ S/div<br>: V $\Rightarrow$ 5mS/div<br>: Others $\Rightarrow$ Sweeping time is specified |
| (5) Voltage values  | : All DC voltage values  |
- \* Since the voltage values of signal circuit vary to some extent according to adjustments, use them as reference values.

### 3. INDICATION OF PARTS SYMBOL [EXAMPLE]

- In the PW board : R1209  $\rightarrow$  R209

### 4. INDICATIONS ON THE CIRCUIT DIAGRAM

#### (1) Resistors

##### ● Resistance value

- |         |                 |
|---------|-----------------|
| No unit | : [ $\Omega$ ]  |
| K       | : [K $\Omega$ ] |
| M       | : [M $\Omega$ ] |

##### ● Rated allowable power

- |               |                |
|---------------|----------------|
| No indication | : 1/4[W]       |
| Others        | : As specified |

##### ● Type

- |               |                             |
|---------------|-----------------------------|
| No indication | : Carbon resistor           |
| OMR           | : Oxide metal film resistor |
| MFR           | : Metal film resistor       |
| MPR           | : Metal plate resistor      |
| UNFR          | : Uninflamable resistor     |
| FR            | : Fusible resistor          |

\* Composition resistor 1/2 [W] is specified as 1/2S or Comp.

#### (2) Capacitors

##### ● Capacitance value

- |             |              |
|-------------|--------------|
| 1 or higher | : [pF]       |
| less than 1 | : [ $\mu$ F] |

##### ● Withstand voltage

- |               |                            |
|---------------|----------------------------|
| No indication | : DC50[V]                  |
| Others        | : DC withstand voltage [V] |
| AC indicated  | : AC withstand voltage [V] |

\* Electrolytic Capacitors

47/50[Example]: Capacitance value [ $\mu$ F]/withstand voltage[V]

##### ● Type

- |               |                                     |
|---------------|-------------------------------------|
| No indication | : Ceramic capacitor                 |
| MY            | : Mylar capacitor                   |
| MM            | : Metalized mylar capacitor         |
| PP            | : Polypropylene capacitor           |
| MPP           | : Metalized polypropylene capacitor |
| MF            | : Metalized film capacitor          |
| TF            | : Thin film capacitor               |
| BP            | : Bipolar electrolytic capacitor    |
| TAN           | : Tantalum capacitor                |

##### (3) Coils

- |         |                |
|---------|----------------|
| No unit | : [ $\mu$ H]   |
| Others  | : As specified |

##### (4) Power Supply

\* Respective voltage values are indicated

##### (5) Test point

- |  |                           |
|--|---------------------------|
|  | : Test point              |
|  | : Only test point display |

##### (6) Connecting method

- |  |                         |
|--|-------------------------|
|  | : Connector             |
|  | : Wrapping or soldering |
|  | : Receptacle            |

##### (7) Ground symbol

- |  |                                 |
|--|---------------------------------|
|  | : LIVE side ground              |
|  | : ISOLATED(NEUTRAL) side ground |
|  | : EARTH ground                  |
|  | : DIGITAL ground                |

## 5. NOTE FOR REPAIRING SERVICE

This model's power circuit is partly different in the GND. The difference of the GND is shown by the LIVE : ( $\perp$ ) side GND and the ISOLATED(NEUTRAL) : ( $\nwarrow$ ) side GND. Therefore, care must be taken for the following points.

- (1) Do not touch the LIVE side GND or the LIVE side GND and the ISOLATED(NEUTRAL) side GND simultaneously. If the above caution is not respected, an electric shock may be caused. Therefore, make sure that the power cord is surely removed from the receptacle when, for example, the chassis is pulled out.
- (2) Do not short between the LIVE side GND and ISOLATED(NEUTRAL) side GND or never measure with a measuring apparatus ( oscilloscope, etc.) the LIVE side GND and ISOLATED(NEUTRAL) side GND at the same time. If the above precaution is not respected , a fuse or any parts will be broken.

◇ Since the circuit diagram is a standard one, the circuit and circuit constants may be subject to change for improvement without any notice.

## HOW TO CHECK THE HIGH VOLTAGE HOLD DOWN CIRCUIT

### 1. HIGH VOLTAGE HOLD DOWN CIRCUIT

After repairing the high voltage hold down circuit shown in Fig. 1.

This circuit shall be checked to operate correctly.

## 2. CHECKING OF THE HIGH VOLTAGE HOLD DOWN CIRCUIT

- (1) Turn the POWER SW ON.
- (2) As shown in Fig.1, set the resistor (between [S1] connector [3] & [4] ).
- (3) Make sure that the screen picture disappears.
- (4) Temporarily unplug the power cord.
- (5) Remove the resistor (between [S1] connector [3] & [4] ).
- (6) Again plug the power cord, make sure that the normal picture is displayed on the screen.
